

SPA CHLORINE DICHLOR GRANULAR

A Concentrated Compound Prepared To Destroy and Control the Growth of Bacteria in Spas and Hot Tubs

FIRST AID: Have the product container or label with you when calling a poison control center or doctor or going for treatment. **IF IN EYES:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. **IF INHALED:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice. **IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. **IF SWALLOWED:** Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to by a poison control center or doctor. Do not give anything by mouth to an unconscious person. **NOTE TO PHYSICIAN:** Probable mucosal damage may contraindicate the use of gastric lavage.

EPA EST. NO. 3432-PA-1 • EPA REG. NO. 3432-69-47921

ACTIVE INGREDIENT:

Sodium Dichloro-s-triazinetriene Dihydrate..... 99%

OTHER INGREDIENTS 1%

Available Chlorine 55% **TOTAL 100%**

**KEEP OUT OF REACH OF CHILDREN
DANGER**

See back panel for additional precautionary statements.

NET WT. 2 LBS.

Mfg. For: **RIISING SUN POOLS & SPAS**
5608 HILLSBOROUGH ST. • RALEIGH, NC 27606

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER. CORROSIVE: Causes irreversible eye damage. May be fatal if inhaled. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin or on clothing. Do not breathe dust, vapor, or spray mist. Wear goggles, face shield, or safety glasses. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove contaminated clothing and wash before reuse.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.

PHYSICAL AND CHEMICAL HAZARDS: STRONG OXIDIZING AGENT. Contact with water slowly liberates irritating and hazardous chlorine containing gases. Decomposes at temperatures above 464°F with liberation of harmful gases. When ignited, will burn with the evolution of chlorine and equally toxic gases. Never add water to this product. Always add product to large quantities of water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible fire and explosion. **IN CASE OF FIRE OR SMOKE:** Call the fire department. Do not attempt to extinguish the fire without a self contained breathing apparatus (SCBA). Do not let the fire burn. Flood with copious amounts of water. **DO NOT** use ABC or other dry chemical extinguishers since there is the potential for a violent reaction. **IN CASE OF CONTAMINATION OR DECOMPOSITION:** **DO NOT** reseal container. Neutralize material to a non-oxidizing state for a safe disposal.

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

OUTDOOR SPA DISINFECTION:

Before bathing, test water, pH, chlorine residual and alkalinity using a suitable test kit. Adjust chlorine residual to 3.0 ppm. After bathing superchlorinate to 6.0 ppm (1 level tablespoon per 500 gallons of water). Use a chlorine stabilizer, especially outdoors, to prolong chlorine residual. Maintain pH of water between 7.2 and 7.6 and total alkalinity between 125 and 175 ppm with the addition of sodium bicarbonate or diluted muriatic acid. This product does not affect pH or alkalinity of water. One tenth oz. (1/2 tsp.) per 500 gal. of water gives 1.0 ppm and 1 level tbsp. gives 6.0 ppm of chlorine. To use, broadcast granules into water with jets running. Bathing can start at once.

With 4 bathers in a 500 gal. spa, a 2.0 ppm chlorine residual can drop below the minimum 1.0 ppm in 15 to 20 minutes. Less water or more bathers will accelerate loss. Test often and keep chlorine residue above 1.0 ppm. Weekly, superchlorinate water to 5 or 6 ppm (see 2 above). Do not bathe until chlorine drops to 3.0 ppm. Draining and cleaning of spa is recommended whenever the water becomes difficult to manage.

STORAGE AND DISPOSAL: Do not contaminate water, food or feed by storage or disposal. **STORAGE:** Keep material dry and in a dry area. Store in original container where temperatures do not exceed 125°F (52°C) for 24 hours. Retie polyethylene liner after each use and keep container tightly closed. **PESTICIDE DISPOSAL:** Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance. Do not put product, spilled product, or filled or partially filled containers into the trash or wastecompactor. Contact with incompatible materials could cause a reaction and fire. **DO NOT** transport wet or damp material. Neutralize material to a non-oxidizing state for safe disposal. **CONTAINER DISPOSAL:** Nonrefillable container. Do not reuse or refill this container. Offer for recycling if available. If Empty: Do not reuse this container. Place in trash or offer for recycling if available. If Partly Filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.
